OCW has published multiple versions of this subject. If designers or engineers think of alternative ways to solve a design problem, make prototypes of each option rather than presupposing the best solution and modeling only one. A course of iteration, fabrication, and validation completes this manual design cycle.

Quality and Validation. Course Description Course Features Demonstration Engineers should build prototypes with just enough detail to answer the specific question at hand. The instructors thank Prof.

But the 7 types of additive manufacturing technologies have moved along and we can produce high-quality documents more easily and at much lower cost than ever before, and these documents help us run the business more effectively.
