Takebayashi, Y. These compounds induce tumor formation by activating protease. Marine organisms known as tunicates also called sea squirts for instance, which spend much of their life anchored to rocks and docks, produce an arsenal of toxins to ward off predators. However, the traditional process of drug discovery and development is lengthy and expensive, so the application of in silico techniques and optimization algorithms in drug discovery projects can provide a solution, saving time and costs. Libraries of synthesized compounds have not been as successful at producing new drugs as many had hoped, he noted. Ferlini, C. Homoharringtonine inhibits protein synthesis Huang,
